

IC24 SaaS Protection for GOOGLE WORKSPACE

Consilien's IC24 SaaS Protection ensures the protection of your Google Workplace (formerly G Suite). It is a fully managed backup, search, restore, and export solution for Gmail, Shared Drives, Contact, and Calendar.

GOOGLE WORKSPACE IS NOT AUTOMATICALLY PROTECTED

As organizations increasingly move data into cloud-based applications, many believe that traditional best practices such as data backup are outdated. After all, SaaS applications are always available, accessible from anywhere, and highly redundant, so why is backup necessary?

The single leading cause of this data loss? End-user error. Other common culprits include:

- Malware or ransomware attacks
- Malicious end-user activity
- Accidental data overwrites
- Canceled account subscriptions

With more and more companies depending on Google Workspace for collaboration and business operations, these risks are impossible to ignore. Backup is just as important in the cloud as it is in traditional, on-premises IT systems. An independent, third-party, SaaS backup solution is the best way to protect organizations against the most common data loss pitfalls.

GOOGLE WORKSPACE IS VULNERABLE TO RANSOMWARE

Many organizations mistakenly believe that Google Workspace data is automatically protected in Google Vault. But that's only partially true. While Google Vault does include some primitive recovery capabilities it does not protect against:

C O N S I L I E N

- **Data loss due to permanent deletion:** If an admin or end-user permanently deletes data, files are only recoverable for a short period of time. Plus, it doesn't provide admins the granular control they need—only a restore of all deleted items in a 25-day window.
- **Data loss due to a RANSOMWARE attack:** If your business suffers a ransomware attack, Google doesn't allow you to roll back your data to a point in time before the corruption occurred.
- **Data loss due to inactive licenses:** As one would expect, an active Google Workspace license is required to access Google Workspace data. Unfortunately, inactive or deprovisioned user data is permanently deleted, and there is no rollback option.

WHY SAAS PROTECTION FOR GOOGLE WORKSPACE?

Trusted Backup

You can be confident that your Google Workplace data is protected with a reliable, robust service designed to reduce the risk and time needed to manage backups.

- **Automated, continuous backups:** Protect Gmail, Calendar, Contacts, and Shared Drives with 3x daily backups or perform additional backups as needed at any time.
- **Flexible retention:** Not all organizations are the same. That's why IC24 SaaS Protection offers different data retention options to meet your individual needs.

Fast & Effortless Restore

- **Point-in-time restore and export:** Consilien can quickly restore or export data from a specific point-in-time before a data loss event occurred.
- **Non-destructive restore process:** Quickly identify and recover individual objects or entire accounts with related records and folder structure intact.
- **Cross-user restore:** Restore data from one Google Workspace user account into another.

Effective Monitoring and Management

Consilien proactively monitors your backups. So, you can be confident in the status of all backup and recovery operations with detailed, actionable reports.

Data Protection and Compliance

Protect valuable business data from accidental or malicious acts.

- **Security and compliance:** IC24 SaaS Protection backs up data in compliance with Service Organization Control (SOC 1/SSAE 16 and SOC 2 Type II) reporting standards and supports HIPAA and GDPR compliance needs.
- **Ransomware protection:** Should data be encrypted we can roll back data to a point in time before ransomware attacks.
- **Custom data retention:** Keep data indefinitely or adjust retention settings to meet compliance standards.
